Product overview

The Cisco Touch 10 control unit is an intuitive device designed to give you a delightful experience when interacting with Cisco video conferencing systems – with just a touch or swipe of your finger. This touch-based unit is optimized for an effortless user experience – from launching and ending a video conference, to sharing content, to viewing contact lists and directories, and even accessing voicemail messages.

The Touch 10 supports the Cisco MX-, SX- and IX-Series, as well as the Cisco Spark Room Series, video conferencing devices.

With the latest innovations, the Touch 10 is also able to easily control other room peripherals such as lighting, room dividers, and curtains, through a customizable API¹.

Figure 1.
Cisco Touch 10 control unit

¹ Requires external third-party control system processor and Collaboration Endpoint Software 8.1 (except for IX5000 which runs Cisco System Software IX 8.1x or later)

Features and benefits

Cisco Touch 10 control unit enhances the ease of connection and communication by providing instant access to meeting, contacts, directories, and content. Touch 10 combines beautiful design and effortless user interaction with a consistent experience throughout the Cisco room-based video conferencing device portfolio.
