

COMMBOX BRINGS YOU THE...
commBOX Easel

Inspired by one of the most fundamental tools for artistic creation, the CommBox Easel has been **specifically designed to support innovation, ideation and collaboration.**

With a tilt angle of up to 12 degrees, the Easel emulates industry specific equipment such as an architect's drafting board or an artist's easel whilst remaining flexible to your needs, providing a comfortable and natural platform for digital creation and projects. The Easel's combination of clean lines, clever design and the stunning timber-look finish of the legs brings an aesthetic to any environment that is both beautiful and modern. Capable of mounting up to a 65" touchscreen or display, the Easel is your perfect huddle space partner. Wheel it in and out of meetings, classrooms, training rooms or collaboration spaces and experience the impact this well designed stand can have on a room. The CommBox Easel truly is the beginning of the next generation in stands.
