

The Conference Room Ecosystem

The Stem Audio ecosystem is a tool-box of networkable devices that give anyone the freedom to mix and match audio into any room for a fully customizable solution.

Mix and match all Stem devices for a customized audio solution.

Set up, control, and manage your ecosystems through your network.

Stem solutions are 100% compatible with your favorite conferencing platforms.

The Building Blocks

Ceiling

Wall

Speaker

Hub

Table

Control

Wall

Optimized to sit on any flat surface or to be mounted on any wall, the Stem Wall is a high-quality conferencing bar array that turns any environment into a professional conference room. With 15 microphones that perform real beamforming plus full-range speakers and subwoofers, Wall makes sure that everyone has a voice.

Table

Designed for tabletops and flat surfaces, the Stem Table is a high-quality conferencing speakerphone. Equipped with nine microphones that perform real beamforming and an innovative downward-facing speaker for amplified performance, Table takes the quality of your meetings to the next level.

Ceiling

Stem Ceiling is a microphone array designed to be mounted above a conferencing space. Whether low profile mounted on a drop ceiling or suspended like a chandelier, Ceiling gives you the aesthetics you need with uncompromising performance. Ceiling's 100 built-in microphones and three array options (wide, medium, and narrow), focus on who's speaking so you can focus on your meeting.

Speaker

Stem Speaker's innovative design gives you the option to mount the device on the ceiling, wall, or table for ultimate flexibility. With its powerful driver and built-in technology, Stem Speaker delivers an exceptional sound experience in any meeting room. As an ecosystem device, you can mix and match devices until your room is customized to meet your needs.

Hub

When more than one device is used in a room, Stem Hub becomes the central communication center for a room by connecting multiple Stem products through the network. Hub comes with multiple connectivity options including USB Type B, Dante®, SIP, and external speakers.

Control

Control provides complete access to the Stem platform along with seamless integrations for your favorite video conferencing platforms for touch-to-join meetings. All while keeping data-rich reports and statistics locked behind the scenes.

The Set Up

PLACE or MOUNT YOUR DEVICE

Bring your products into your room and place them wherever you want.

PLUG THEM IN

Plug your products in and connect them to the network.

GIVE THEM A HOME

Create a new room via the Stem platform or assign your products to an existing room.

From design to implementation

Stem was designed to give every IT department the freedom to design, install, and manage every conference room all on their own.

DESIGN → INSTALL → ADAPT → CHECK → MANAGE

Know exactly which products you need for your meeting space

Set up your Stem room all on your own in minutes

Instantly optimize your products for peak performance

Check the clarity and coverage of the audio in the room

Manage and monitor your ecosystem from anywhere over the network
